

## CADMS Seminar Series\*

### **Faculty, Staff and Students**

School of Veterinary Medicine

*You are cordially invited – Mark your calendars!*

## **Prospects of veterinary epidemiology research in Bangladesh: special focus on neonatal calf diarrhea**

Invited Speaker: **Sharmin Chowdhury, DVM, MSc, PhD**

Associate Professor of Veterinary Epidemiology,

Chittagong Veterinary and Animal Sciences University, Bangladesh

&

Fulbright Visiting Scholar at UC Davis

Dr. Chowdhury is conducting several studies to understand the risk of introduction and spread of different zoonotic and transboundary diseases affecting livestock and poultry. Her research is based on a multidisciplinary, holistic approach to integrate the role of humans, animals and environment in infectious disease epidemiology.
