

CADMS Seminar Series*

Faculty, Staff and Students

School of Veterinary Medicine

You are cordially invited – Mark your calendars!

Managing the wildlife-domestic interface in South-East Spain

Invited Speaker: **Professor Joaquin Vicente, DVM, MSc, PhD**

SaBio (Sanidad y Biotecnología, *Health & Biotechnology*) research group,

National Wildlife Research Institute (IREC)- CSIC - University of Castilla – La Mancha, Spain.

Dr. Vicente is focused on the bovine tuberculosis problem in extensive Mediterranean systems (e.g. Doñana National Park, Cabañeros National Park, Game estates), addressing from a multidisciplinary point of view the interactions between wild ungulates and extensive livestock (pathology, molecular biology, environmental microbiology, farm husbandry, animal behaviour, remote telemetry, GIS, contact recording).
