

CADMS Seminar Series*

Faculty, Staff and Students

School of Veterinary Medicine

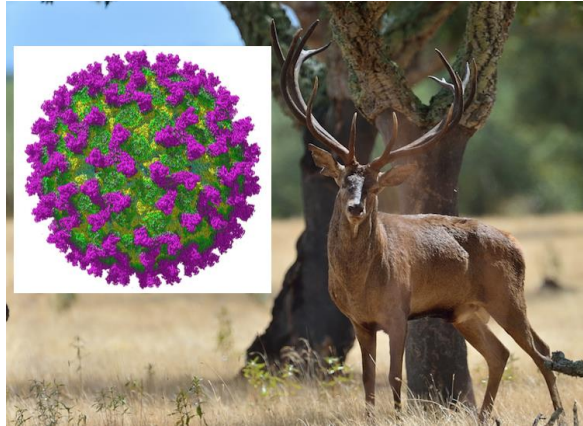

You are cordially invited – mark your calendars!

The role of wildlife in emerging infectious diseases in Spain

Invited Speaker: **Ignacio García Bocanegra, DVM, PhD, Dip
ECZM (Wildlife Population Health)**

Associate Professor,

University of Córdoba, Spain

Dr. García Bocanegra's research interest is in the epidemiology and control of infectious diseases at the wildlife-domestic interface, particularly those considered to be emerging or re-emerging. He will be presenting part of his recent work related with West Nile, Bluetongue, Schmallenberg and Bagaza virus.
